

This graphic shows fossilized dinosaur tracks. They are common in parts of Northwestern and in the southwestern United States.

Dinosaur Track Example

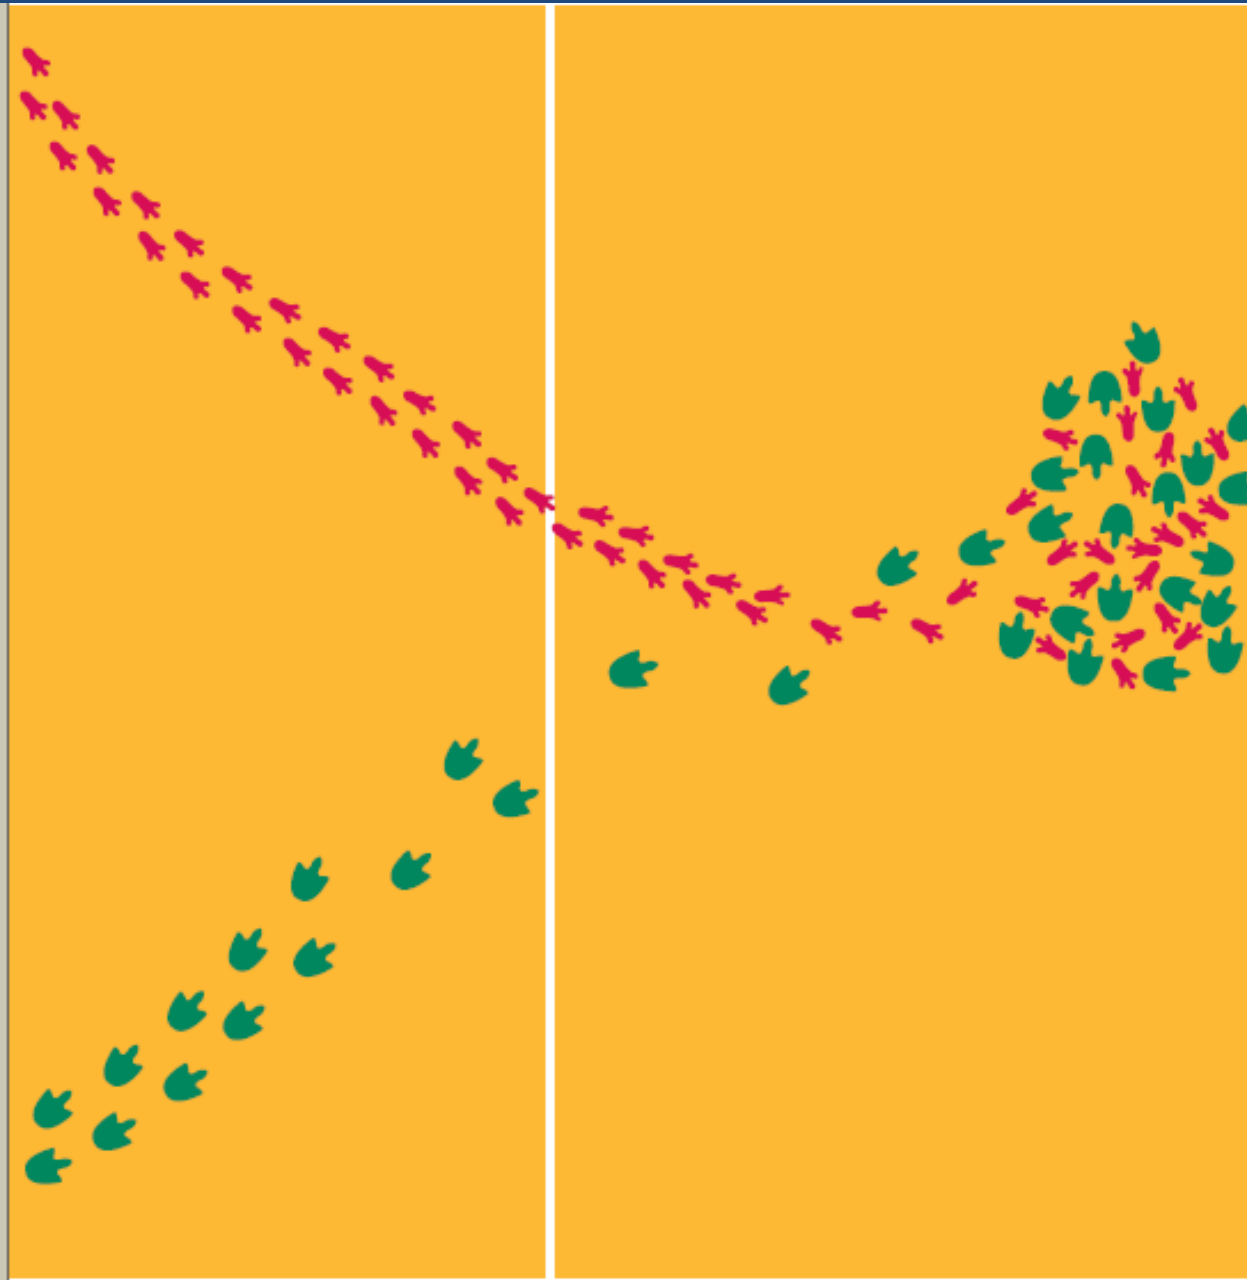

This graphic shows fossilized dinosaur tracks. They are common in parts of Northwestern and in the southwestern United States.

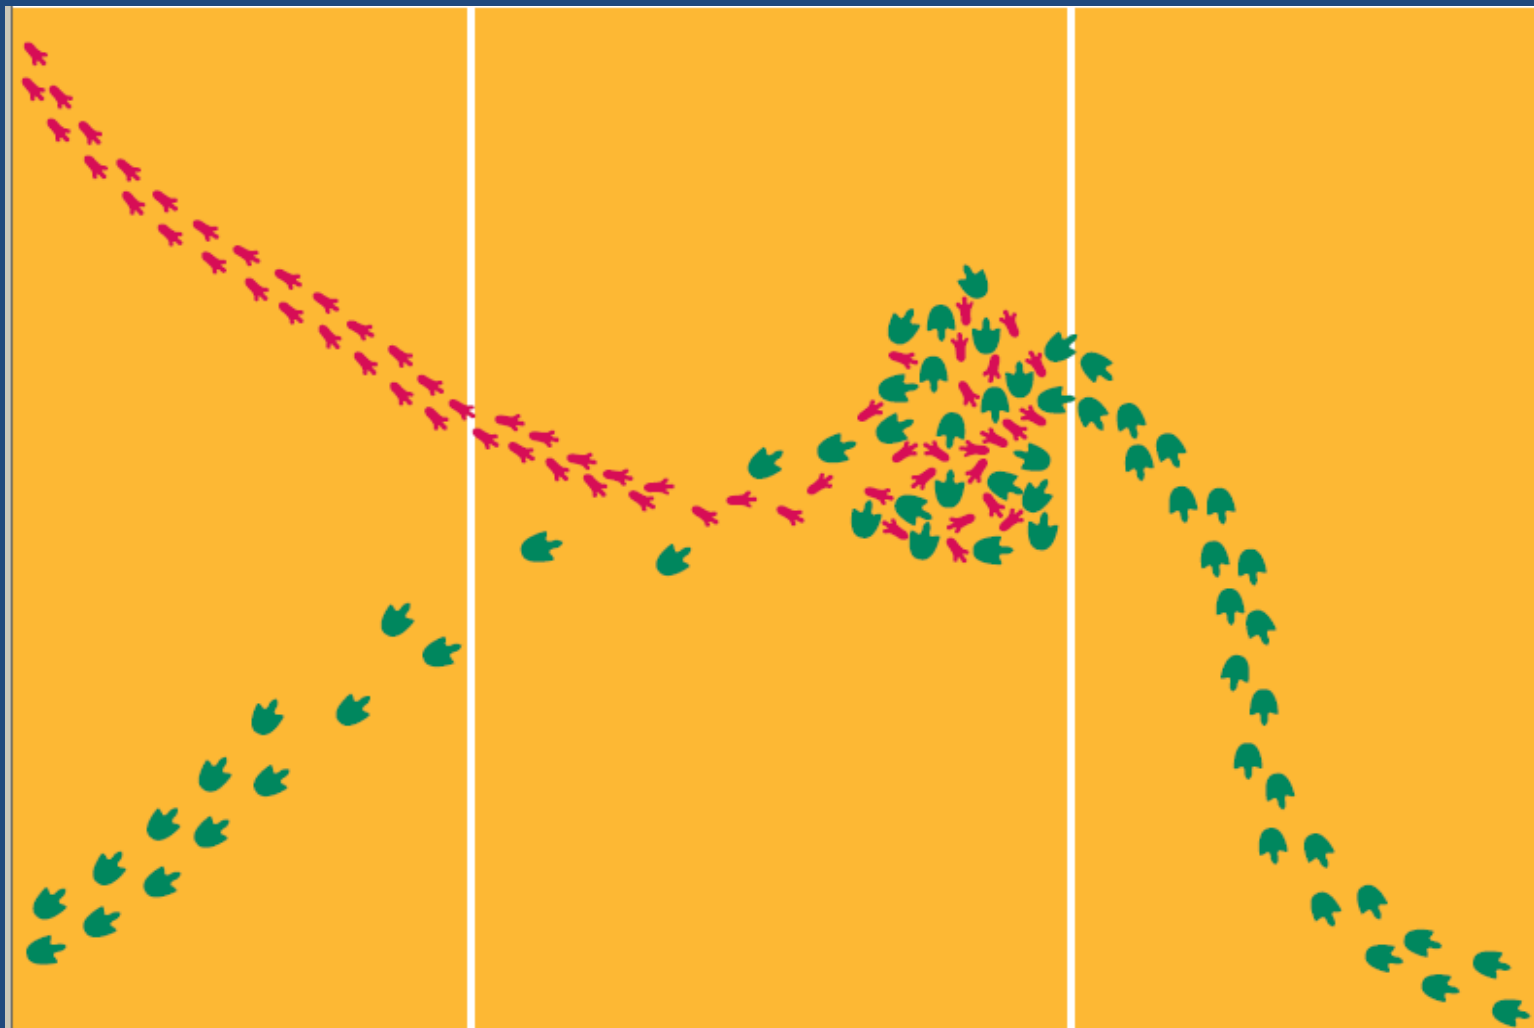

What do you OBSERVE in the graphic? (At least 3)

What can you INFER from your observations? (at least 1)

Now what do you think?

List at least 3 observations and 1 inference

One more time, make 3 observations and infer what happened based on your observations.

Homework

ROLE: Author

AUDIENCE: K-7 students

FORMAT: Short Story or Picture Book

TOPIC: Write a story about the tracks pictured in this activity. Use your observations and inferences to create your story. Your story can be as long as you want or as short as three paragraphs (one paragraph for each picture).
