## Isotopes of an Element:

Objective: $\qquad$

Key Concepts:
Atomic Mass:

Atomic Mass: $\qquad$
Unit for Atomic Mass: $\qquad$

On the modern periodic table, are the atomic masses for the elements written as whole numbers?

> Yes No

What does the atomic mass tell us about atoms of an element? $\qquad$
$\qquad$

The atomic mass is an $\qquad$ of all the $\qquad$ of an
$\qquad$ for an $\qquad$ .

Isotopes:
$\qquad$ are the different and $\qquad$ of an element.

All forms of an element have the same number of $\qquad$ and $\qquad$ . Isotopes $\qquad$ in the number of $\qquad$ in the $\qquad$ of an atom. Isotopes can have $\qquad$ than the most common form of an atom.

## Isotopes of an Element: Processing

1. Use your periodic table to fill in the atomic mass for each of the following elements.
2. Using the atomic mass and the atomic number, calculate the amount of neutrons an atom has in the most common form for the elements.

| Element | Elements Atomic <br> Number | Elements Atomic <br> Mass | Number of Neutrons in <br> Most Common Form |
| :---: | :---: | :---: | :---: |
| Hydrogen $(\mathrm{H})$ | 1 |  |  |
| Helium $(\mathrm{He})$ | 2 |  |  |
| Lithium $(\mathrm{Li})$ | 3 |  |  |
| Boron $(\mathrm{B})$ | 5 |  |  |
| Carbon $(\mathrm{C})$ | 6 |  |  |
| Nitrogen $(\mathrm{N})$ | 7 |  |  |
| Oxygen $(\mathrm{O})$ | 8 |  |  |

3. After figuring out the number of neutrons an atom of element has in its most common form, determine how many neutrons each atom for following elements have. The number next to the name of the element is the atomic mass for that specific atom/isotope.
4. State whether that atom type is the common form or isotope form for the element.

| Element | Elements Atomic <br> Number | Number of Neutrons | Isotope of Common <br> Form |
| :--- | :--- | :--- | :--- |
| Hydrogen -1 |  |  |  |
| Hydrogen -2 |  |  |  |
| Hydrogen -3 |  |  |  |
| Helium -4 |  |  |  |
| Helium -5 |  |  |  |
| Lithium -6 |  |  |  |
| Lithium -7 |  |  |  |
| Boron -10 |  |  |  |
| Boron -11 |  |  |  |
| Carbon -12 |  |  |  |
| Carbon -13 |  |  |  |
| Nitrogen -13 |  |  |  |
| Nitrogen -14 |  |  |  |
| Nitrogen -15 |  |  |  |
| Oxygen -16 |  |  |  |
| Oxygen -18 |  |  |  |
