

Layers of Earth Pieces

Directions: Cut out the piece on the other sheet of paper. Label and glue the different layers and features that make up Earth. Then research about each layers of the Earth and glue the information charts with the right layer of Earth. Finally, color the different layers and feature of Earth.

Inner Core	Outer Core	Upper Mantle	Crust
Lithosphere	Asthenosphere	Continental Crust	Oceanic Crust
Middle Mantle	Lower Mantle	Convection Currents	

Crust

- Composition (What is it made of?):
- Thickness (in km):
- State of Matter (solid, liquid, or gas):
- Interesting Fact:
