Directions: Fill in chart of the life dependent carbon macromolecules using the textbook and the molecule reading. On the back, of this sheet, write at least a 6-8 sentence paragraph about which molecule you think is the most important macromolecule. Cite evidence from both of the readings to help in your explanation.

| Macromolecules : Polymer | Monomer Name | Element Make-up | Examples | Functions or Uses |
|---|-------------------------|----------------------------|-----------------|--------------------------|
| Carbohydrates | | | | |
| Lipids | | | | |
| Proteins | | | | |
| Nucleic Acids | | | | |
