# Transcription & Translation Summary
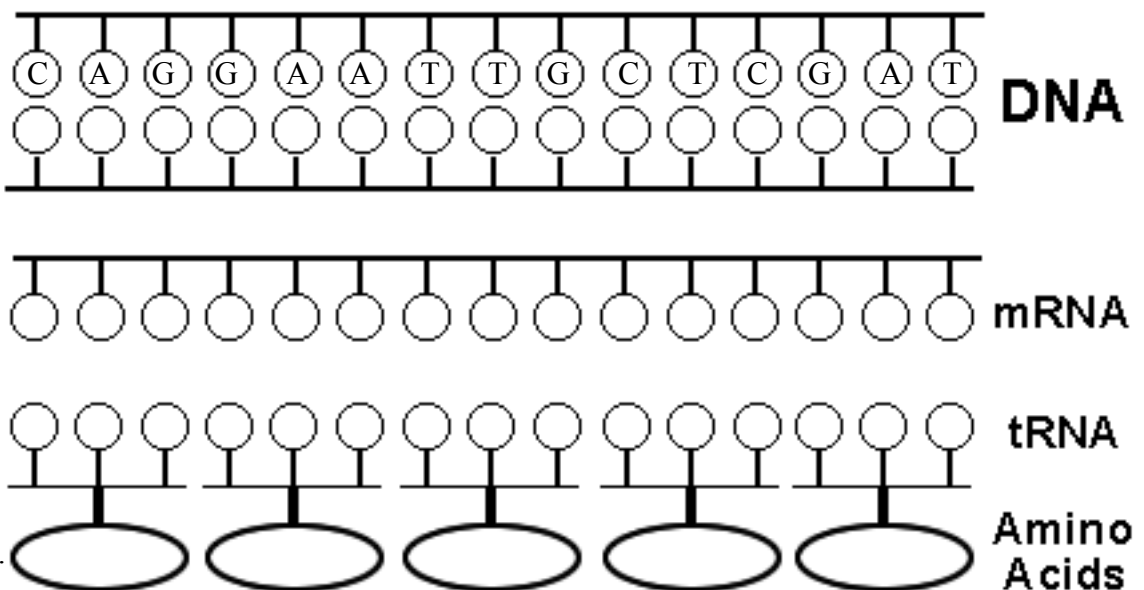

For each example:
      a. fill in the complimentary DNA strand
      b. fill in the correct mRNA bases by transcribing the bottom DNA code
      c. fill in the correct tRNA bases
   d. translate the mRNA codons to find the correct amino acids

Example #1

Example #2

Example #3

G T A C T C A A G G T C T A G **DNA**
