

# Types of Volcanoes

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Period: \_\_\_\_\_ Page: \_\_\_\_\_

## Objectives:

1. \_\_\_\_\_  
\_\_\_\_\_
2. \_\_\_\_\_  
\_\_\_\_\_

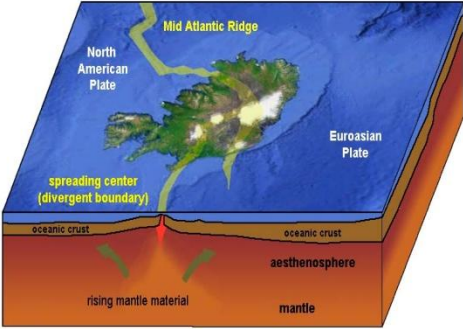

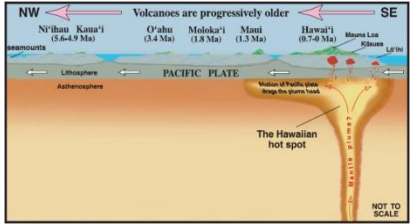

## What are Volcanoes?

- A volcano is a \_\_\_\_\_ that allows \_\_\_\_\_ to escape from a \_\_\_\_\_.
- Volcanoes form the \_\_\_\_\_ over the course of \_\_\_\_\_.

## Where do Volcanoes Form?

- Mid Ocean Ridge: \_\_\_\_\_ where plates \_\_\_\_\_ allowing \_\_\_\_\_ to rise up to fill the gap between plates
- Subduction Zone: \_\_\_\_\_ where one \_\_\_\_\_ another where the plate \_\_\_\_\_, mixes with sea-water, and rises up to reach the surface
- Hot Spot: either a \_\_\_\_\_ in the \_\_\_\_\_ or a \_\_\_\_\_ in the \_\_\_\_\_

## Examples of Where Volcanoes Form

1.	2.	3.
		
<p>Example:</p>	<p>Example:</p>	<p>Example:</p>

## Types of Volcanoes:

<p><b>Cinder Cone:</b></p> <p>(drawing)</p>	<ul style="list-style-type: none"><li>• Size:</li><li>• Shape:</li><li>• Slope:</li><li>• Eruption Style:</li><li>• Type of Lava:</li><li>• Special Properties:</li> <li>• Examples:</li></ul>
